Location
Indonesia

Methodology
Dataset: The data was obtained and provided by the World Food Programme from ArcGIS REST Services from various government GIS portals, accessed through QGIS REST interface.

Caveats / Comments
Administrative level 1P-codes are not consecutive; level 1 P-codes start with p-code "ID11" instead of "ID01".

Some administrative level 3 and 4 names include slashes (/ or) that may indicate alternate names. They may need to be separated and placed into alternate name fields.
